

DIRECTORY OF TOLL PROCESSORS

Published in the February issue of *Metal Center News*

Metal Center News updates its Directory of Toll Processors on a continual basis throughout the year and publishes a new version each February.

Toll processors apply their technology and expertise to customers at all levels, from mills to distributors to OEMs. Companies in this directory report that roughly 60 percent of their business comes from mills, 25 percent from service centers and 15 percent from OEMs, on average.

MCN's Directory of Toll Processors is designed as a simple-to-use resource to help companies locate a service provider that can meet their specific needs. It includes contact information, including Web address, and a summary of each company's service capabilities and capacity for handling specific types and forms of metal products. Companies are listed alphabetically, grouped into seven regions. Note that a company may market its services in several regions, though its processing facilities are located elsewhere.

COST

\$85.00 per copy
