

Do You Move Metals?

Moving metal from a mill to a service center, or from a service center to an end user, is a complicated procedure that not every carrier can handle. If your company is involved in logistics and transportation for the metals industry, then you belong in the Metal Center News Transportation Directory. This valuable resource, to be included in the July issue of Metal Center News, will allow you to promote your services to the 15,000 service center and toll processing operators who read MCN monthly. The listing is **FREE OF CHARGE**.

Please fill out this brief questionnaire.

Please fill in the following contact information to be published in the *Transportation Directory*:

Company _____

HQ Address _____

Phone: _____ Fax: _____

Email: _____ Web: _____

Not for publication: Please list a contact person, phone number and email address to verify information:
